Enhance Secured Protection for Healthcare Workers

# Disposable Swab Collecting Cover for Patient's Use

## WHAT is

“Swab collecting cover”?

This product is made of PE-clear transparent material. It is a full-face design applied to the head being inspected, one-time use, with unique design of white insertion point it's convenient for healthcare work to insert and move around the swab during collecting the sample. This product is low cost, one-size-fits-all, and easy to use with no supply worries.

## Purpose

This product is to act as an extensive barrier to protect the healthcare worker to prevent second infection through patient's cough or sneeze during collecting the sample through the mouth or nose.

Medical safety protection for everyone. Not just for patients.

## Why using

“Swab collecting cover”?

It reduces the changing time for healthcare workers, they can continue collecting the specimen without changing the PPE (personal protective equipment) frequently. They just need to discard the exam gloves that may contact with patients and the cover that they remove for the patient

This product it reduces the risk of infection to the healthcare workers and other people.
